SCHEMATIC DIAGRAM OF SINGLE USE SHUANGSHENG

1. In terms of the relationship between height and weight, the higher floors need to reduce the lifting weight accordingly. The length of the steel wire rope has an impact on the load. The standard 12-meter rope can lift the maximum load. It will affect the loading weight if more than 12m accordingly.

the length of wire rope	12M	20M	30M
Maximum load weight	max payload*100%	max payload*75%	max payload*50%
